

Co-Editors: Luciano Adorini, Massimo Locati

BOOK OF ABSTRACTS

P5.21.10
CD27+IgM+IgD+ B cells in Persistent Polyclonal B-cell Lymphocytosis are hyperproliferated memory B cells with a distinctive immunophenotype
 M. Berkowska¹, C. Gosselcher-Wagener¹, H. Adhaansen², D. de Oude³, J. van Dongen⁴, M. van Zelm⁵,
 ErasmusMC, Rotterdam, Netherlands, ²Gelre ziekenhuizen,

P5.21.11
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells
 F. Hajghasemi, N. Kakadezuli,
 Department of Immunology, Faculty of Medicine, Shahed University, Tehran, Iran.

P5.21.12
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia
 F. Jaddi-Niragh¹, G. Chalamfarsa², A. Memaran², H. Asgarian², S. Razavi³, A. Sarrafnejad⁴, F. Shokri⁵,
 Department of Immunology, School of Public Health, Tehran University of Medical Sciences, Tehran, Iran, ²Department of Immunology, School of Medicine, Tehran University of Medical Sciences, Tehran, Iran, ³Clinic of Hematology and Oncology, Firzgar Hospital, Faculty of Medicine, Tehran University of Medical Sciences, Tehran, Iran, ⁴Department of Hematology, Firzgar Hospital, Faculty of Medicine, Tehran University of Medical Sciences, Tehran, Iran, ⁵Department of Hematology, Firzgar Hospital, Faculty of Medicine, Tehran University of Medical Sciences, Tehran, Iran.

P5.21.13
Insufficiency: report of 2 cases
 K. Djenuhat¹, H. Messaoud², M. Chahri³,
 Institut Pasteur of Algiers, Algiers, Algeria, ²Hôpital Zmirli, Algiers, Algeria.

P5.21.14
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.15
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia
 F. Jaddi-Niragh¹, G. Chalamfarsa², A. Memaran², H. Asgarian², S. Razavi³, A. Sarrafnejad⁴, F. Shokri⁵,
 Department of Immunology, School of Public Health, Tehran University of Medical Sciences, Tehran, Iran, ²Department of Immunology, School of Medicine, Tehran University of Medical Sciences, Tehran, Iran, ³Clinic of Hematology and Oncology, Firzgar Hospital, Faculty of Medicine, Tehran University of Medical Sciences, Tehran, Iran, ⁴Department of Hematology, Firzgar Hospital, Faculty of Medicine, Tehran University of Medical Sciences, Tehran, Iran, ⁵Department of Hematology, Firzgar Hospital, Faculty of Medicine, Tehran University of Medical Sciences, Tehran, Iran.

P5.21.16
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells
 F. Hajghasemi, N. Kakadezuli,
 Department of Immunology, Faculty of Medicine, Shahed University, Tehran, Iran.

P5.21.17
Insufficiency: report of 2 cases
 K. Djenuhat¹, H. Messaoud², M. Chahri³,
 Institut Pasteur of Algiers, Algiers, Algeria, ²Hôpital Zmirli, Algiers, Algeria.

P5.21.18
Rituximab in the treatment of EBV-positive low grade B-cell lymphomas: is there additional benefit regarding EBV infection?
 P. T. Diamantopoulos¹, K. Polonyi¹, M. Sofotastou¹, V. Papadopoulou¹, G. Zervakis¹, T. Vassilakopoulos¹, M. Angelopoulou¹, M. Sakantaris¹, G. Pangalis¹, N. Viniou¹,
 Laikon General Hospital, National and Kapodistrian University of Athens, Athens, Greece.

P5.21.19
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.20
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.21
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.22
Insufficiency: report of 2 cases

P5.21.23
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.24
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.25
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.26
Insufficiency: report of 2 cases

P5.21.27
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.28
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.29
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.30
Insufficiency: report of 2 cases

P5.21.31
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.32
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.33
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.34
Insufficiency: report of 2 cases

P5.21.35
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.36
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.37
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.38
Insufficiency: report of 2 cases

P5.21.39
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.40
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.41
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.42
Insufficiency: report of 2 cases

P5.21.43
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.44
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.45
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.46
Insufficiency: report of 2 cases

P5.21.47
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.48
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.49
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.50
Insufficiency: report of 2 cases

P5.21.51
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.52
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.53
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.54
Insufficiency: report of 2 cases

P5.21.55
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.56
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.57
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.58
Insufficiency: report of 2 cases

P5.21.59
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.60
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.61
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.62
Insufficiency: report of 2 cases

P5.21.63
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.64
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.65
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.66
Insufficiency: report of 2 cases

P5.21.67
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.68
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.69
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.70
Insufficiency: report of 2 cases

P5.21.71
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.72
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.73
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.74
Insufficiency: report of 2 cases

P5.21.75
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.76
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.77
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.78
Insufficiency: report of 2 cases

P5.21.79
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.80
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.81
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.82
Insufficiency: report of 2 cases

P5.21.83
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.84
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.85
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.86
Insufficiency: report of 2 cases

P5.21.87
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.88
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.89
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.90
Insufficiency: report of 2 cases

P5.21.91
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.92
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.93
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.94
Insufficiency: report of 2 cases

P5.21.95
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.96
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia

P5.21.97
Effect of a calcium channel blocker on matrix metalloproteinase-9 activity in human monocytic THP1 cells

P5.21.98
Insufficiency: report of 2 cases

P5.21.99
Severe phenotype of IgD multiple myeloma with acute renal insufficiency: report of 2 cases

P5.21.100
Downregulation of IL17 producing T cells is associated with lymphocytic leukemia
